BXFZp781C0629_r1 781 (synonym: hlcc4) Homo sapiens cDNA clone
DKFZp781C0629_5', mRNA sequence. Eukaryota, Metazoa, Chordata, Craniata, Vertebrata, Euteleostomi, Mammalia; Eutheria, Primates, Catarrhini, Hominidae, Homo.

[(bases 1 to 839)
Lauber,J., Bahr,A., Mewes,H.W., Weil,B., Amid,C., Osanger,A., Fobo,G., Han,M. and Wiemann,S.
EST (Lauber,J., Bahr,A., Mewes,H.W., Weil,B., Amid,C., et al.)
Unpublished (2003) Ingolstaedter Landstr.1, D-85764 Neuherberg, Germany
This is the 5' sequence of the clone insert
Clone from S. Wiemann, Wolecular Genome Analysis, German Cancer
Research Center (DKEZ), Email S. Wiemann@dkfz- heidelberg.de,
sequenced by Qiagen (Hilden/Germany) within the cDNA sequencing consortium of the German Genome Project.

No s1 sequence available.

This clone (DKFzp781C0629) is available at the RZFD in Berlin. BX643713.1 GI:34478046 sapiens (human) Contact: MIPS Homo sapiens EST. Homo DEFINITION RESULT 1 BX643713

TROPICALIS_SEQUENCE_ID: TEGG022i22.plkSp6
Sequencing primer: SP6
This sequence is from a Xenopus Gene Collection (XGC) library
constructed by Aaron M. Zorn.
CONSTRUCTED To primed from Sug of poly A+ RNA from egg.
ECORI.NotI cut cDNA was then ligated into pCS107 with EcoRI at the
Vector: pCS107; Site 1: ECORI, Site_2: NotI
Host: Escherichia_coli XL1-blue.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  193 GGTTTGATTTCCATTCCTCTGTACATCCCTCACGTGTTGTTT----AACTGGAATTTTGGA 249
